## Remote access by VPN

Direct access to resources wherever you are.

## Refworks

Allows you to create a personalized database of bibliographic in an easy and convenient way

# Collection

The Map Library "Rafael Mas" is specialised in cartographic materials. These materials are interesting for many areas, especially in geography and environmental sciences degrees. There is also a high demand from scholars of studies such as classical philology, history, chemistry, psychology or economics.

The collection is mainly composed of cartographic materials in various formats: maps (topographic, geological, land use, historical, etc.), plans, nautical charts or aerial photographs. Furthermore, suitable equipment is available for their optimal use.

Due to its special nature the collection is not available in open shelves and there are special rules for loan.

Library highlights

## Cartographic information resources

Digital cartography, Comunidad de Madrid ortophotographs (scale 1:5000) and satellite maps (Spot-Landsat).

Geographic Information System: Arc Gis 9.3 (GIS vector) and Idrisi Taiga (GIS raster), gvSig.
